

Chemical Vacuum Pump & Digital Gauge

MZ 2 NT

Diaphragm pumps are an excellent solution for continuous, oil-free evacuation and pumping of gases.

All parts in contact with pumped media are made of aluminium and selected plastics and allow a wide range of applications for non-corrosive gases.

The two-stage construction provides the advantageous combination of high pumping speed and an ultimate vacuum down to 7 mbar.

The highly flexible fabric-reinforced double diaphragm made of FKM is ideal for extended operating life. The new NT-series features further improved performance data.

Performance features

- contamination-free pumping and evacuation
- high flow rate even near ultimate vacuum
- whisper quiet
- very low vibration exceptionally long diaphragm life and maintenance-free drive system for low lifetime
